GIANT SIZED JUMBLING TOWER

OBJECT OF THE GAME

The object is to remove one block each turn from the middle or bottom of the "Jumbling Tower" and place it on top without knocking over the tower. The game continues with players each taking a turn until the tower falls.

GETTING READY TO PLAY

To set up your "Jumbling Tower" put three blocks next to each other. Lay them side by side leaving a small space between blocks. The next row is also made of three blocks put down as per diagram below. This continues with the blocks being used three at a time until all the blocks are in the tower.

LET'S PLAY

Youngest player goes first, then play continues to the left, with each player removing one block and placing it on top in the same crisscross way the tower was built. You may use only one hand. You may touch a block to see if it is loose. If you move this block and do not place it on top, you must put it back in its original position. Next player goes.

WINNING

When a player makes the tower fall, the player who went before that player is the winner.
